

LEGACY™  
LOCKERS

## OUR SINGULAR GOAL...

3

Legacy Lockers is a leading provider of custom lockers and related furnishings for golf and country clubs, fitness facilities, and athletic departments nationwide. Here, the traditional skills of millwork craftsmen are blended with modern project planning, value engineering, and workflow optimization to create extraordinary storage solutions. With project experience ranging from single facility renovations to nationwide design-build solutions - and the broadest selection of formats, materials, hardware, and finishes - you'll find Legacy Lockers uniquely qualified to meet virtually any project requirement. **Our Singular Goal:** Deliver the highest quality product, with unsurpassed customer service and guaranteed quality, to meet your vision on time and within budget. It's an objective we put to work everyday, on every project. And one we look forward to confirming with you.

**To us, every locker is a work of art, and a product of pride.**

Whether you select full-length lockers with premium, hand rubbed exotic wood finishes or multi-tiered lockers with affordable laminate surfaces; the fit, finish, and craftsmanship from Legacy Lockers is virtually unmatched in the industry.

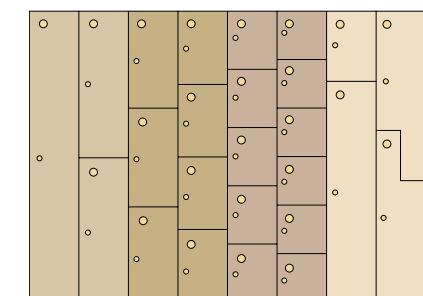

## THE ULTIMATE IN PERSONAL STORAGE...

5

From exotic woods and custom finishes to advanced security and interior amenities, the alternatives available to you are virtually unlimited. Working from a base of proven configurations, Legacy Lockers offers wide range of construction options that create maximum value in terms of material yield, space planning, functionality, and appearance. The result: personal storage solutions that deliver years of trouble-free service, and like-new appearance, as affordably as possible. Whatever the controlling factors of your project - time, value, space, or appearance - Legacy Lockers is uniquely qualified to deliver the longevity, functionality, and aesthetic quality you expect in custom locker solutions.

**The widest variety of locker configurations, accessories, and finishes available.**

Drawers, cubbies, shelves, clothes rods, hooks, mirrors, locks...whatever you're looking for, Legacy Lockers can accommodate; with spacious full-length lockers, popular "Z" tiered lockers, and space-saving 'stacked' configurations of up to eight individual lockers.

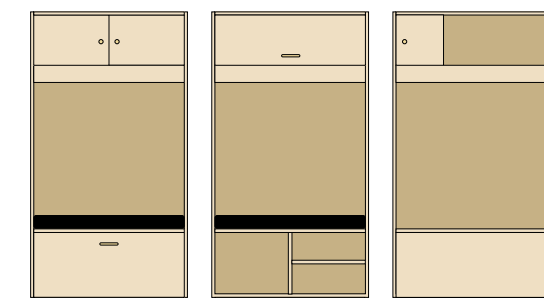

## TEAM LOCKERS...

7

The days of bare metal cages are long gone. Networked audio/visual systems, phone/internet connectivity, and integrated fresh-air capabilities are only a few ways Legacy Lockers is pioneering locker room technology. Legacy Lockers engineers every team locker for years of trouble-free service and like-new appearance. From rigid marine grade substrates, to enduring laminate finishes, high strength assemblies, and product line design standards; Legacy Lockers delivers the durability, functionality, and aesthetic quality you demand - and athletes will value - for years to come.

Team lockers are constructed from the most durable materials available to provide long-lasting, attractive, and functional storage in more physically demanding environments. Our most popular configurations - shown above - feature open hanging garment storage and integrated lockable bench seat. Advanced options include networked audio/visual systems, phone/internet connectivity, and integrated fresh-air capabilities.

## OTHER AMMENITIES...

9

A well-equipped locker is much more than a simple storage area. It provides comfort, convenience, and a sense of privacy for your guests; which is why Legacy Lockers offers such a wide variety of amenities and accessory options, including..

Seating, Vanities, and Towel Stations are now integral parts of every locker room solution.

In addition to perfectly matching the appearance and quality of your new lockers, many construction options are available including end caps, integrated, free-standing, and moveable.

Custom designs to suit virtually every application and space configuration are also available.

## ABOUT OUR COMPANY...

Whatever the nature of your next project, the team at Legacy Lockers is ready, with a combined 65 years of millwork and project management expertise. From our premium substrates, to enduring finishes and high-strength assemblies, to exciting new features like integrated ventilation and audio/visual systems, Legacy Lockers is uniquely qualified to design, build, and deliver personal storage solutions that deliver years of trouble-free service and like-new appearance as affordably as possible.

By fusing experience, research, technology, and innovation into a unique production methodology, Legacy Lockers strives to maximize your investment from start to finish. From our portfolio of proven base configurations, we explore various construction and configuration models to identify your greatest possible value in terms of material yield, space planning, and functionality.

Every locker is constructed entirely on site at our state-of-the-art manufacturing facility in Dallas, TX. Here you will find some of the most advanced woodworking technology in the industry, producing an

exceptionally accurate and consistent fit and finish. Literally every cut, groove, slot, and hole is precisely located within tolerances up to 1/32 of an inch.

Through networked computer controls, our technicians continually monitor, manage and adjust the construction process. Questions and challenges are immediately addressed and accurately remedied long before your lockers reach their destination. The simple result: rigid quality controls and maximum operational efficiency to keep your project on schedule and on budget.

As individual components are completed, skilled craftsmen begin hand-assembly of the lockers. Locker cabinets are securely joined together and pressed into perfect square alignment by a unique machine developed solely for this purpose. Once the cabinets are complete, internal accessories such as drawers, cubby doors, hooks and hinges are installed. In parallel with cabinet construction, locker doors are crafted and finished with the painstaking detail of fine furniture. Finally, the doors and locks are installed, and the finished lockers are staged for delivery.

Our shipping preparation and protection second to none. Once assembled, each locker is wrapped in heavy duty craft paper to protect the finish and hardware from scratches. Finally, the locker is covered from top to bottom with several layers of foam sheeting to further protect the locker faces.

For shipment, smaller projects are grouped in sets, placed on pallets, bound together with multiple layers of clear plastic stretch wrap, and secured with industrial strength shipping straps. For larger projects, lockers are directly floor-loaded and secured on dedicated air-ride trailers. Legacy Lockers takes every precaution to ensure your lockers arrive in pristine condition.

We trust this introduction will help qualify Legacy Lockers for your next golf or country club, fitness facility, or athletic facility project; and we sincerely look forward to participating in your next request for proposal.

Given the opportunity, Legacy Lockers will prove your requirements for quality, economy, and deliverability can, and will, be met!
